

NAME: Escape room AI using stresspatches

DATE: May 2, 2025 7:54 AM

DESCRIPTION OF TECHNOLOGY

Measuring stress to increase the positive experience of an escape room.

HUMAN VALUES

We already changed the ai from making the decisions to only advicing and suggesting.

TRANSPARENCY

We made an questionnaire and a hand out to inform the user about the AI.

IMPACT ON SOCIETY

It's obvious that security is very important and that is something that needs to be increased at every possible oppertunity.

STAKEHOLDERS

There are no true improvements to make

SUSTAINABILITY

There might be ways to make the AI less intensive for the CPU and thus lower the amount of power the CPU pulls. The display itself can also just be two lights, 1 meaning difficulty up and the other down. However the amount of energy spared by this is minimum.

HATEFUL AND CRIMINAL ACTORS

Instead of actually having the AI locally, it could be hosted on another server to increase security in the programming.

DATA

we have already thought long and hard about it, which is why we made everything anonymously and based on volunteering. If the group doesn't want their data used then it won't be used. It's also the the majority of the group, must want their data being used for the AI to be able to do it's job. If that is not so then there is no reason to use it.

FUTURE

This question doesn't fit.

PRIVACY

We have though hard about this and as it stands, there is no futher need for improvement.

INCLUSIVITY

Our goal is very specific and it comes with a small group of people. In order to increase that group we would have to either adapt or make another AI for a different use.

# IMPROVEMENTSCAN - CANVAS - HESPEDE room AI using stresspatches

**NAME:** Escape room AI using stresspatches

**DATE:** May 2, 2025 7:54 AM

**DESCRIPTION OF TECHNOLOGY**  
Measuring stress to increase the positive experience of an escape room.

**IMPACT ON SOCIETY**

Now that you have thought hard about the impact of this technology on society (by filling out the questions...

If you think about the real problem this technology is going to solve. If you think about the ability of this technology to solve the real problem. If you think about possible negative effects and whether this technology will contribute to a world you want to live in. If you think about all that, what improvements would you make? In technology? In context? In use?...

**HATEFUL AND CRIMINAL ACTORS**

Now that you have thought hard about how bad actors can impact this technology, what improvements would...

If you think about this technology being used to break the law, or avoid the consequences of breaking the law, or to be used against certain groups, or to attack the truth or to pit certain groups against each other. If you think about all of that, what improvements would you (want to) make? In the technology? In context? In use?...

**PRIVACY**

Now that you have thought hard about privacy and data protection, what improvements would you like to make?...

If you think about this technology invading someone's privacy or collecting personal data and if you think about the way this technology is compliant with prevailing law and mitigates dataprotection risks and concerns. If you think about all that, what improvements would you (want to) make? In the technology? In context? In use?...

**HUMAN VALUES**

Now that you have thought hard about the impact of your technology on human values, what improvements...

If you think about the impact of this technology on human values and needs. If you think about how this technology affects the identity of the user, the autonomy of the user (can the users make their own decisions?) and the health and well-being of the user. If you think about all that, what improvement would you (want to) make? In the technology?...

**STAKEHOLDERS**

Now that you have thought hard about all stakeholders, what improvements would you like to make? List them...

If you think about all stakeholders of this technology. If you think about stakeholders that are less obvious. If you think about the way certain stakeholders are affected by this technology and if you want to take them into consideration. If you think about all that, what would you (want to) improve? In the technology? In context? In use?...

**DATA**

Now that you have thought hard about the impact of data on this technology, what improvements would you...

If you think about the limitations of data. Things like subjectivity, incomplete datasets and so on. If you think about the way new insights are handled. If you think about the sustainability of the collection of data or the data that is collected from the users. If you think about all that, what would you (want to) improve? In the technology? In context?...

**INCLUSIVITY**

Now that you have thought hard about the inclusivity of the technology, what improvements would you like to...

If you think about accessibility to this technology. If you think about built in biases or automatic decisions that may be biased. If you think about who is benefitting from this technology and the diversity of the team that creates the technology. If you think about all that, what improvements would you (want to) make? In the technology? In context? In use?...

**TRANSPARENCY**

Now that you have thought hard about the transparency of this technology, what improvements would you like t...

If you think about the communication on the way the technology works and the businessmodel. If you think about the explanation on automatic decisions that are made. If you think about complaint procedures and transparency on possible negative effects. If you think about all that, what would you (want to) improve? In the technology? In context?...

**SUSTAINABILITY**

Now that you have thought hard about the sustainability of this technology, what improvements would you like t...

If you think about the direct and indirect energy use and the materials that are used in the technology. If you think about the lifespan of the technology and the hidden environmental impact of the technology. If you think about all that, what improvements would you (want to) make? In the technology? In context? In use?...

**FUTURE**

Impact Improvement: Now that you have thought hard about the future impact of the technology, what...

If you think about an utopian and a dystopian scenario. If you think about the way this technology can change the world. If you think about the consequences of a different party buying your technology. If you think about all that, what would you (want to) improve? In the technology? In context? In use? ...
