

QUICKSCAN CANVAS

of education with a focus on removing traditional instructor-led teaching as intermediaries in knowledge transfer.

NAME: Digitalization of education with a focus on removing traditional instructor-led teaching as intermediaries in knowledge transfer.

DATE: May 15, 2026 11:00 AM

DESCRIPTION OF TECHNOLOGY
The technology aims to fully digitalize education by replacing traditional instructor-led teaching with self-directed, digital forms of knowledge transfer. This includes e-learning platforms, video-based learning modules, and audio content such as podcasts. The goal is to make education more accessible, flexible, and scalable

HUMAN VALUES

TRANSPARENCY

IMPACT ON SOCIETY

The core problem this technology aims to address is the inefficiency, inflexibility, and limited accessibility of traditional, instructor-led education. Many educational systems are still dependent on physical presence, fixed schedules, and variable teaching quality, which can exclude large groups of learners due to geographic, economic, or personal constraints. Moreover, instructor-centered learning often doesn't scale well and may not meet the diverse needs and learning styles of modern students....

STAKEHOLDERS

SUSTAINABILITY

HATEFUL AND CRIMINAL ACTORS

Since this technology primarily focuses on knowledge transfer without formal assessments or exams, risks related to cheating or fraud in certification are minimal.

However, because the content involves defense-related information though not classified as departmental confidential there is a potential risk that personal data of learners, such as identity details or residence information, could unintentionally leak through the platform....

QUICKSCAN CANVAS OF HUMAN VALUES with a focus on removing traditional

instructors as intermediaries in knowledge transfer

NAME: Digitalization of education with a focus on removing traditional instructors as intermediaries in knowledge transfer.

DATE: May 15, 2026 11:00 AM

DESCRIPTION OF TECHNOLOGY
 The technology aims to fully digitalize education by replacing traditional instructor-led teaching with self-directed, digital forms of knowledge transfer. This includes e-learning platforms, video-based learning modules, and audio content such as podcasts. The goal is to make education more accessible, flexible, and scalable

HUMAN VALUES

How is the identity of the (intended) users affected by the technology?

To help you answer this question think about sub questions like:

- If two friends use your product, how could it enhance or detract from their relationship?
- Does your product create new ways for people to interact?...

TRANSPARENCY

Is it explained to the users/stakeholders how the technology works and how the business model works?

- Is it easy for users to find out how the technology works?
- Can a user understand or find out why your technology behaves in a certain way?
- Are the goals explained?
- Is the idea of the technology explained?
- Is the technology company transparent about the way their...

IMPACT ON SOCIETY

What is exactly the problem? Is it really a problem? Are you sure?

Can you exactly define what the challenge is? What problem (what 'pain') does this technology want to solve? Can you make a clear definition of the problem? What 'pain' does this technology want to ease? Whose pain? Is it really a problem? For who? Will solving the problem make the world better? Are you sure? The problem definition will help you to determine...

STAKEHOLDERS

Who are the main users/targetgroups/stakeholders for this technology? Think about the intended context by...

When thinking about the stakeholders, the most obvious one are of course the intended users, so start there. Next, list the stakeholders that are directly affected. Listing the users and directly affected stakeholders also gives an impression of the intended context of the technology.

...

SUSTAINABILITY

In what way is the direct and indirect energy use of this technology taken into account?

One of the most prominent impacts on sustainability is energy efficiency. Consider what service you want this technology to provide and how this could be achieved with a minimal use of energy. Are improvements possible?

HATEFUL AND CRIMINAL ACTORS

In which way can the technology be used to break the law or avoid the consequences of breaking the law?

Can you imagine ways that the technology can or will be used to break the law? Think about invading someone's privacy. Spying. Hurting people. Harassment. Steal things. Fraud/identity theft and so on. Or will people use the technology to avoid facing the consequences of breaking the law (using trackers to evade speed radars or using bitcoins to launder...)

DATA

Are you familiar with the fundamental shortcomings and pitfalls of data and do you take this sufficiently into...

There are fundamental issues with data. For example:

- Data is always subjective;
- Data collections are never complete;
- Correlation and causation are tricky concepts;
- Data collections are often biased;...

FUTURE

What could possibly happen with this technology in the future?

Discuss this quickly and note your first thoughts here. Think about what happens when 100 million people use your product. How could communities, habits and norms change?

PRIVACY

Does the technology register personal data? If yes, what personal data?

If this technology registers personal data you have to be aware of privacy legislation and the concept of privacy. Think hard about this question. Remember: personal data can be interpreted in a broad way. Maybe this technology does not collect personal data, but can be used to assemble personal data. If the technology collects special personal data (like...

INCLUSIVITY

Does this technology have a built-in bias?

Do a brainstorm. Can you find a built-in bias in this technology? Maybe because of the way the data was collected, either by personal bias, historical bias, political bias or a lack of diversity in the people responsible for the design of the technology? How do you know this is not the case? Be critical. Be aware of your own biases....
